

**ASEAN FOREIGN MINISTERS' STATEMENT ON
ILLEGAL TRANSBOUNDARY MOVEMENT OF HAZARDOUS WASTE
AND OTHER WASTES IN SOUTHEAST ASIA**

2 August 2019

1. We expressed our serious concern on the growing threat and adverse effects to human health and the environment posed by the increased illegal transboundary movement of hazardous waste and other wastes in Southeast Asia.
2. We rejected the illegal transboundary movement of wastes to our region, and emphasized that all states take necessary measures to ensure the environmentally sound management of hazardous waste and chemical waste in their respective jurisdictions to ensure the protection of human health and the environment, and enhance cooperation with other jurisdictions, including through the exchange of relevant information and capacity building.
3. We reiterated our readiness to work with the international community to enhance cooperation in preventing illegal traffic of transboundary movement of hazardous chemicals and wastes in line and, as appropriate, with agreed international frameworks such as the Basel Convention, the Rotterdam Convention, the Stockholm Convention, the Minamata Convention, and the Montreal Protocol as well as internationally agreed-upon systems such as the Globally Harmonised System of Classification and Labelling of Chemicals (GHS), in order to promote a Southeast Asia region that is free from illegal transboundary movement of waste, including hazardous waste and other wastes.
